Cover

An unusual image that departs from the clichéd associations with summer's arrival and giddy lovers, to evoke alternate possibilities – warning sign of a future without flowers and green leaves? Or, tired of all that cloying honey and photographers who expect it to freeze on flowers, has this butterfly decided to get real and feel the harsh texture of rocks on its delicate wings?

Ketaki Sathe who shot this picture on the upper reaches of Dehra Dun says it is quite usual for such Indian Tortoise Shell butterflies to bask in early morning sunlight, absorbing heat and salts from moist rocks.

(Picture by Ketaki daughter of D S Sathe)

FUN RIOT

at Thermax workplaces

Employees across Thermax made sure that while they got their jobs done, there was also enough fun to keep the corridors ringing with laughter and happy memories. With lots of help from a cheerful Santa Claus and sugary Sankranti treats, riotous holi colours and diya and cubicle decorating contests. Some warm and vibrant snapshots.

A President at Chinchwad

Cool and green
in Europe

Thermax vapour absorption systems are eminently qualified to meet Europe's demand for green energy – through cogeneration, solar energy, fuel cells and biomass.

Its environment-friendly chillers are finding applications in the global push for conserving energy and preserving the environment.

Across Europe, Thermax chillers are supported by a network of sales offices in Holland, Paris, Spain, Luxembourg, Portugal,

Thermax warmly welcomed the German President, Prof. Dr. Horst Köhler on his official visit to India. During the 90 minute visit, the President, accompanied by his wife, Eva Luise and a delegation blazed a trail of goodwill. He won over the hearts of Thermax employees with his informality and friendliness. Dr. Köhler had gracious words for the sustainable model that Thermax has created – one that blends family values and professional management.
