Press Release

Thermax wins Rs. 279 crore order for a captive cogeneration power plant

Pune: April 26, 2018

The Thermax Group has concluded a repeat order of INR 279 crore from a leading public sector Fertiliser company to set up their captive cogeneration plant at Trombay. The project is for a GTG (Gas Turbine Generator) - cum- HRSG (Heat Recovery Steam Generator) based cogen plant of 50MW capacity on an EPC basis.

As a part of the customer's drive to reduce energy consumption as well as dependence on grid power, they plan to install two units of GTG with HRSG to generate power and steam simultaneously.

“Owing to the government's thrust on making India self-sufficient, the fertiliser sector has seen a tremendous growth and so has the demand for power. The need for reliability of power supply coupled with energy-efficient technologies makes cogeneration a preferred choice for customers where we have secured multiple orders recently,” says M.S. Unnikrishnan, MD & CEO, Thermax Limited.

The scope of supply includes design, engineering, manufacturing, construction and commissioning of the cogeneration plant. The project is to be completed in 24 months.

About Thermax Limited: Thermax Limited, a leading energy and environment solutions provider is one of the few companies in the world that offers integrated innovative solutions in the areas of heating, cooling, power, water and waste management, air pollution control and chemicals. Thermax has manufacturing facilities in India, China, Europe and South East Asia. The sustainable solutions Thermax develops for client companies are environment-friendly and enable efficient deployment of energy and water resources.
