News Release

Thermax wins Rs. 477 crore order for captive power plant

Pune: November 19, 2009.

Thermax Limited, the Pune-based energy and environment solutions provider, has received a Rs. 477.77 crore order from a leading conglomerate in Orissa for constructing and commissioning a turnkey captive power plant for its ferro alloy unit in Orissa.

For the 2 x 60 MW power plant, using coal washery rejects as fuel, Thermax will provide two boilers using CFBC (circulating fluidised bed combustion) technology. It will also supply the air pollution control, water treatment and effluent treatment systems for the power plant.

Thermax has pioneered energy generation from coal washery rejects in India, and this order is the latest among several projects commissioned across the country.

About Thermax Limited

Thermax Limited, the Rs. 3,300 crore (USD 680 million) leader in energy and environment management, is one of the few companies in the world that offers integrated solutions in the areas of heating, cooling, power, water and waste management, air pollution controls and chemicals. The sustainable solutions Thermax develops for client companies are environment friendly and enable efficient deployment of energy and water resources. Headquartered in Pune, India, Thermax's international operations are spread over Southeast Asia, the Middle East, Africa, China, Russia, the United Kingdom and the United States.
