SolPac™ Solar Solutions

Steam & Hot Water Solutions for Industrial Processes

Harness the power of the sun with
SolPac™ Solar Thermal Solutions !

SolPac™ P60

Parabolic Trough

- SolPac P60, the solar parabolic trough concentrates solar energy on a line receiver at its focus where high temperature hot water or high pressure steam is generated.
- Suitable for low pressure steam generation upto 18 bar or process Hot Water upto 210^{0}C.
- Ideal Product for High Temperature Process Heating Application by steam or hot water across industries.
- It is also the ideal product for Solar Cooling Applications along with Vapour Absorbtion Chiller.
