

# Thermax D-Type Boiler (Thermstar)

## Product Features

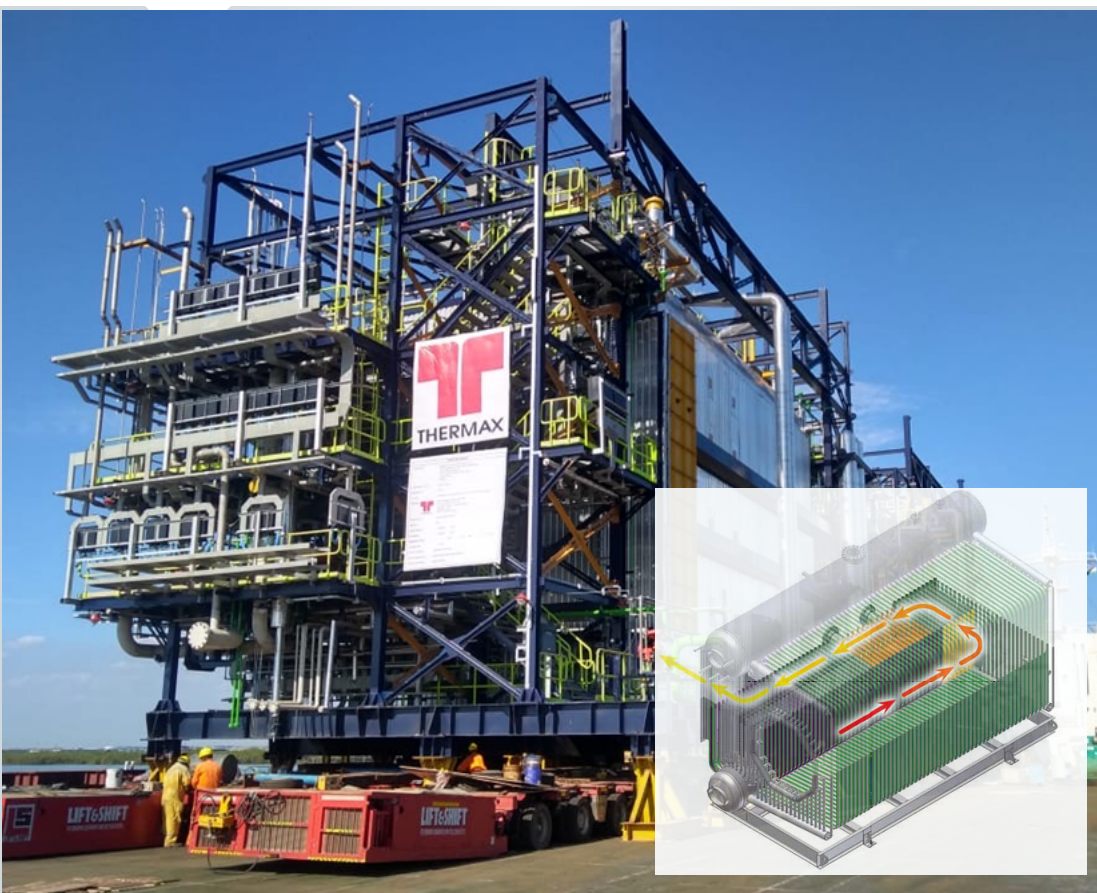

- Leak proof and Fully packaged Boilers with Modular construction
- High Quality fully automated membrane panel construction
- Demister Pads to ensure high steam purity
- Higher turndown ratio offered for better operational flexibility
- Convenient Burner Cleaning with steam purging if applicable
- Higher thermal efficiency by incorporating bare / fin tubes
- Conservative heat release rates for reliable operation and longer life
- Convective type superheaters with complete draining provision
- Accepts wide range of Oil and Gas fuels
- Available in field erected/modular/plug & play variants depending on site transportable limits

Manufactured as per Technology developed by Thermax

## Operating Range

- Capacity : Upto 500 TPH
- Pressure : Upto 110 kg/cm<sup>2</sup>(g)
- Temperature : Upto 538°C

## Major Clients

- ♦ Dangote Oil Refining Company, Nigeria
- ♦ National Mineral Development Corporation (NMDC), India
- ♦ JSW Steel, India

4 units of 400 TPH, 107 kg/cm<sup>2</sup>(g), 520°C Natural Gas fired D-type boiler
